Database

Introduction Global Research

We have the expertise to help institutional and corporate clients – as well as our colleagues at HSBC – navigate these uncertain times. **Our award-winning analysts produce more than 12,000 reports each year with topical, timely and relevant insight** on everything from currency movements to commodities, bond yields, global stock markets, macroeconomics, and technology trends.

Our international footprint spans the geographies that matter most to our clients, and our on-the-ground presence in major emerging markets complements our deep expertise in the developed markets. **Our experience in China differentiates us from other research houses**, as shown by our coverage of the A-share market through HSBC Qianhai Securities, our majority-owned China onshore joint venture. **On the other side of the globe, we have recently expanded our US equity coverage to over 270 stocks, amounting to c.USD28.4trillion of market cap.**

Collaboration across asset classes is key to our approach, with a dedicated team offering a global, multi-asset perspective. And we continue to focus on the distinctive strengths that clients value.

We have **sharpened our focus on thematic research**, taking deep dives into trends that are likely to reshape markets for years to come – including demographics, disruptive technologies, and the transition to a net-zero future. Data science is increasingly integrated across our platform, as we deploy **machine learning technology to inform everything from equity strategy to FX**. And our pioneering ESG team is supporting colleagues to put **environmental, social and governance considerations** at the heart of financial models and investment opinions.

As we bring our expertise to new audiences, we offer a variety of ways to access our work. These include a **Global Research app** showcasing key reports, and – to give prospective clients a sense of our output – public access to a curated selection of podcasts and live events. Read on to find out how you can subscribe.

We look forward to hearing from you.

Sincerely, David May
